

PRODUCT DATA SHEET

CHEM BOWL INDUSTRIAL TOILET BOWL CLEANER

Removes Unsightly Stains:

CHEM BOWL's formulation effectively removes hideous uric acid and iron stains from toilet bowls. It also eliminates lime scale deposits and other foreign matter from the ceramic with its dominant application.

Fast Acting:

CHEM BOWL has a high acid content which contributes to the product's fast acting and penetrating ability, eradicating stains and rings from toilet bowls rapidly.

Sanitizes:

CHEM BOWL contains quaternary ammonium compounds which effectively kills odor-causing bacteria.

Contains Special Ingredients:

CHEM BOWL is specially formulated to provide thorough and safe cleaning. It contains thickeners which allow it to dwell on stained areas of ceramic as it clings to the sides of the bowl. CHEM BOWL also protects toilet bowl fittings through its acid inhibitor which ensures that only stains, rings and deposits are removed.

Powerful Cleaner:

CHEM BOWL's industrial blend of soil removing surfactants, acid and germicidal detergency delivers potent action against difficult stains and odors.

Consult your CHEM CLEAN Specialist for specific use directions.

GENERAL USE DIRECTIONS:

Apply directly using swab or brush. For difficult stains, allow to dwell for 5-10 minutes before scrubbing.

KEEP OUT OF REACH OF CHILDREN
DO NOT MIX WITH ANYTHING BUT WATER
STORE IN A TIGHTLY CLOSED CONTAINER
DO NOT REUSE CONTAINER.
FOR INDUSTRIAL USE ONLY

ACTIVE INGREDIENTS:

Hydrochloric Acid (<20%)

DANGER:

It causes severe burns. Harmful if swallowed. Eye irritant. Protect skin, eyes and mucous membranes from contact with this product or solutions of it.

FIRST AID

EXTERNAL: Immediately flush skin with cool running water for at least 15 minutes. Immediately remove contaminated clothing and wash before reuse.

EYES: Immediately flush with plenty of running water. Remove contact lenses, if applicable. Continue flushing for at least 15 minutes.

INTERNAL: If swallowed consult a Physician. **DO NOT** induce vomiting. Rinse mouth. Do not give Carbonates or Bicarbonates. Immediately drink a large quantity of raw egg, milk or milk of magnesia then drink large quantities of water. Never give anything by mouth to an unconscious person.
